

123BIM 3D INFRASTRUCTURE VISUALIZATION TECHNOLOGY

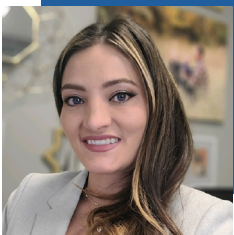

Who We Are?

Since 2005, RDV Systems has been delivering innovative visualization and BIM software products. RDV works to lead the industry with a streamlined 3D real-time, visual communication solution at a cost feasible for projects of any size. Consultants and public agencies around the world rely on RDV's 123BIM software products and services to visualize, analyze and communicate their designs with stakeholders and the public.

What Others Are Saying...

"This was such a great tool to let people see an actual representation of what the end product was going to look like from any point they wanted."

Nicole Williams
Project Manager
Kimley Horn

Key Features

Present your design while moving freely around the 3D model, show different conditions such as design alternatives and construction staging.

Create unlimited number of images, animated videos and virtual tours assets at no additional cost.

Fully integrate with other visualization tools like 3ds Max, Unity, Infraworks, Sketchup, and VISSIM for workflow data sharing.

Rapidly create models using the approach 'Publish Don't Render' and save valuable time and unnecessary man-hours.

The Benefits of 123BIM

	123BIM Technology	Traditional Visualization
Rapid Model Creation	✓	✗
Reasonable and Affordable Cost	✓	✗
Fewer Man-Hours	✓	✗
Updating Project Changes in Near Real-Time	✓	✗
Exporting Unlimited Image & Video	✓	✗
1-Click Connectivity on Social Media	✓	✗
Interactive Cross-Platform/Device Viewing	✓	✗
No Installation Required	✓	✗

SEE THE TECHNOLOGY IN ACTION

"We needed 3D visualization to show these complex designs to people in a way they could understand."

Jamille Robbins
Public Involvement Group Leader
North Carolina Department of Transportation
